Patent Counseling and Prosecution
Intellectual Property
Life Sciences

Dr. Felipe Guzman focuses his practice on patent preparation and patent prosecution with an emphasis in the areas of material science, electrochemistry and life sciences.

Prior to joining Cooley, Felipe was a senior research scientist with ten years of industrial experience developing materials, components and products related to energy storage and energy conversion technologies (fuel cells, batteries, capacitors), biosensors, medical diagnostics, DNA manipulation and sequencing.

Felipe's doctoral research focused on the synthesis and characterization of materials that exhibit high activity for interfacial charge transfer reactions including semiconductor heterogeneous photocatalysts, organic-inorganic (hybrid) thin films, and bimetallic electrodes for solid oxide fuel cells. His work has been published in various peer-reviewed journals including Journal of the American Chemical Society, Journal of Power Sources, Energy & Fuel and Topics in Catalysis.

Education

University of Akron
PhD, Chemical Engineering, 2009

University of Akron
MS, Chemical Engineering, 2005

Universidad Nacional de Colombia
BS, Chemical Engineering, 2002

Admissions & Credentials

US Patent and Trademark Office

Memberships & Affiliations

American Chemical Society
