Boston

Nick counsels clients on patent and intellectual property matters concerning biotech and pharmaceutical technologies. His experience in navigating the intricacies of the US Patent and Trademark Office, as well as foreign patent offices, has resulted in a strong track record of securing patent protection for his clients' innovations. He focuses on all aspects of a given technology, including active ingredients, manufacturing and formulations, in the strategic development of patent portfolios and product life cycle management. His practice also extends to conducting comprehensive due diligence assessments in the context of mergers and acquisitions and licensing and financing transactions. He also performs freedom-to-operate and validity analyses assessing the risk of potential patent infringement.

Education

Suffolk University JD, cum laude, 2020
