Patent Counseling and Prosecution
Life Sciences Corporate Partnering and Licensing

Hannah focuses on patent counseling and prosecution. She has nine years of experience in invention mining and procurement, freedom-to-operate and competitive landscape analyses, transactional asset intellectual property diligence, strategic patent application drafting and all aspects of prosecuting US and international patent applications in the small molecule medicinal chemistry space.

Drawing on her background in synthetic organic chemistry and research experience in small molecule medicinal chemistry, Hannah works primarily with clients in the life sciences, biotechnology and pharmaceuticals sectors, with additional experience in food science and materials science.

Education

University of Maryland, Baltimore County PhD, Chemistry and Biochemistry, 2016

Agnes Scott College BS, Chemistry, 2009
