Intellectual Property Litigation

+1 650 843 5376

Palo Alto

Allie is a partner in Cooley's intellectual property litigation practice group. Her practice focuses on cases that require in-depth comprehension of the client's technology. She has represented clients across diverse industries, including video streaming and editing, augmented and virtual reality hardware and software, network communications software and hardware, consumer electronics, medical devices and social media.

Allie is passionate about collaborating with her clients to develop case strategies that best account for their unique technologies and litigation goals. By leveraging her master's degree in engineering and clerkship experience at district and appellate courts, Allie pairs a deep understanding of her clients' tech with a holistic view of the course of the litigation.

Allie has experience representing clients through all stages of litigation – from pre-suit analysis through trial and appeals – and in venues throughout the US, including California, Texas, New York and Delaware, as well as before the US Patent and Trademark Office. Allie also maintains an active pro bono asylum practice.

Before joining Cooley in 2016, Allie clerked for Judge Michelle T. Friedland in the US Court of Appeals for the Ninth Circuit and Judge Lucy H. Koh in the US District Court for the Northern District of California.
