Patent Counseling and Prosecution – Agricultural Science

Elizabeth focuses on the preparation and prosecution of patents in the pharmaceutical and biotechnology realm. She also prepares invalidity, freedom-to-operate, and patentability opinions. Elizabeth has technical expertise in a wide range of disciplines, including biomaterials, nanotechnology, CAR T therapy, and antibody discovery.

Elizabeth's doctoral research in chemistry at Emory University focused on the development of peptide biomaterials. Subsequently, Elizabeth completed a post-doctoral fellowship at Dana-Farber Cancer Institute in Boston, MA, where she developed antibody and CAR T therapies for ovarian cancer. Elizabeth has co-authored several publications, appearing in Expert Opinion in Drug Discovery, the Journal of the American Chemical Society, Protein-based Engineered Nanostructures, Interface Focus, and Structure.

Education

Georgetown University Law Center

JD, 2024

Emory University

Ph.D, Chemistry, 2016

University of Virginia

BS, Chemistry, Specialization in Biochemistry, 2011

Admissions & Credentials

District of Columbia

United States Patent and Trademark Office (USPTO)
