Patent Counseling and Prosecution – Technology

Patent Office Litigation

Technology

Jennifer Volk-Fortier's practice focuses on the representation of high-technology clients in connection with patent prosecution in the electrical and mechanical fields. Her technical experience includes a wide range of electrical technologies including biomedical engineering, software development and robotics. She also has experience in post grant review proceedings before the United States Patent and Trademark Office (USPTO), including *inter partes review* (IPR) and covered business method (CBM) review proceedings.

While at George Washington School of Law, she served as an extern for the Honorable Judge Rader of the US Court of Appeals for the Federal Circuit. During her undergraduate studies at George Mason University, she was The Volgenau School of Information Technology and Engineering Undergraduate Student of the Year. She also co-authored several technical papers, which led to the development of a book chapter that was published in *Intelligent Engineering Systems and Computational Cybernetics* by Springer Publishing in early 2008.
