+1 650 849 7025

Sudheer is a seasoned technology and data leader with more than 20 years of experience driving enterprise strategy, large-scale transformation and operational excellence across the insurance, healthcare and banking industries. He has a proven track record of leading global engineering organizations, delivering strategic enterprise initiatives, and building scalable, resilient data ecosystems that enable business growth, innovation and informed decision-making.

Throughout his career, Sudheer has partnered closely with business and technology leaders to align strategic priorities with technology investments, modernize enterprise platforms, strengthen operational capabilities and deliver measurable business value. His leadership approach emphasizes collaboration, accountability and empowering teams to solve complex challenges. He is particularly passionate about developing talent, fostering a culture of continuous learning, and exploring how emerging technologies and AI can create new opportunities for organizations.

Based in the Dallas, Texas, area, Sudheer brings a people-first leadership philosophy and believes that lasting transformation is built through strong partnerships, shared vision and a commitment to excellence.
